Value

VLS is the premier provider of integrated vehicle logistics and processing services, offering the total solution from transportation and storage to inspection and claims. Our management team knows your business because we come from your business, with hands-on experience working in all facets of the automotive industry. We offer national reach to manage your entire logistics process and the flexibility to customize solutions that fit your needs. The result: lower costs and a more productive operation that will improve your competitive advantage.

The Total Solution

To achieve the results you desire we continuously monitor and measure key logistics processes that ensure customer satisfaction through a fully integrated vehicle logistics solution. We pay special attention to details and measure all service trend data. We offer access to our inventory database in real-time, provide system security as well as a back-up transmission log of all customer data. When activity processes are performed on a vehicle, we provide you with an electronic update by VIN to ensure accuracy. It's the total solution for reliable vehicle logistics.

Experience

Why settle for a logistics network that requires you to change your business when you can have a supply chain solution that delivers the optimal business value for your company without compromise and without impacting your existing systems. We consistently provide leading customer service in vehicle logistics, processing and inspection. VLS has a thorough understanding of the automotive industry and our team of professionals who have worked with global automotive manufacturers, carriers and processors deliver the technical knowledge for integrated logistics from physical transportation to systems integration. We understand today's challenges. We use our knowledge to customize solutions that deliver the maximum cost-savings while improving your customer's satisfaction. Our expertise shows in everything we do. Years of experience with cutting edge technological tools empower our people to streamline your supply chain. We are your company's eyes and ears in major storage areas, ports, railheads and truck depots throughout the United States – an extension of your operation.

■ Logistics Management

- Outsourced accountability of the entire vehicle logistics process from plant/port to final handoff point
- Seamless management of in-transit repairs

■ Transportation

- On-time delivery using qualified vendors
- Real time status of all vehicles and documentation handling

■ Storage

- Paved, lighted, fenced and guarded sites
- Key control for locked vehicles

■ Processing

- Cost-effective process solutions meeting customer technical requirements
- Quality fabricating and up-fitting

■ Inspection

- Your eyes and ears at handoff points with experienced inspection personnel
- Analytic exception reporting, highlighting areas of concern, Quality reporting

■ Claims

- We manage claims and ensure that your interests and assets are protected
- We take measures to reduce/eliminate potential hazards before they become damage/claims

Why VLS?

Our people understand the challenges you struggle with everyday, be it from rail transport shortages to intermodal congestion and other logistics resource limitations. We analyze your situation and apply our expertise and systems to design tailored supply chain management solutions. We deliver the complete solution – no expensive software licenses or empty promises. We work closely with you to meet and exceed your expectations. We become an extension of your organization using our systems and our people to provide control and direct accountability. The result is an integrated supply chain that drives cost-savings and value, improving business performance with better management of inventory, vehicle process tasks, facility utilization, operational velocity and a smooth flow of finished vehicles. Seamless performance reduces cost and increases dealer and customer satisfaction.

Visibility & Control

With VLS, you are guaranteed state-of-the-art technology. We have remained on the cutting edge in order to deliver process solutions giving you the visibility and control you need to manage your supply chain at a higher level. VLS can also manage the process and free you from handling the day-to-day headaches. Our experienced staff of managers has designed our technology in-house and will work with you directly to integrate our systems via EDI and the web for seamless information flow at lower cost. You gain visibility that will produce a new sense of control and clarity in logistics. Our systems support the logistics operations of your business and will meet your cost targets while driving process efficiency. Most importantly, our technology is backed by the people who developed it with years of experience in vehicle logistics. It's the total solution – people, process and technology.

Mission Statement

To achieve the highest level of quality service in vehicle logistics management by:
